Grass Canada Hardware

Grass Vionaro Drawer System

LEADING SOFTWARE SOLUTIONS

The Purpose and Benefit of this Package

Thank you for your interest in this Grass Hardware Package. This package has been created, for your use with the Grass Products. The information used is based on typical uses for the Grass Products, as indicated by Grass.

This package is compatible only with Cabinet Vision version 10 or higher. This package WILL NOT work with any previous versions of CV.

The following Instructions will help you to import and use this package.

Enjoy!

Package Contents

This package contains the following items:

- Drawer/Rollout Construction Methods
 - Vionaro System Drawer
 - o Vionaro System Rollout
- Material Schedules:
 - o Vionaro Graphite
 - o Vionaro White
- Materials:
 - o Misc Materials for variations on the Vionaro Drawer system. (Kitting Purposes only)

General Notes

- It is **STONGLY** recommended that you create a backup of your current database prior to importing this package. See the **Backup and Transferring Standards** topic, in the Solid help file for more information.
- This package was created using metric standards.
- Values used can be changed to reflect the sizes used in your shop.
- Some extra machining, that has been added to the hardware in the models, is NOT accessible for all versions. The hardware is intended to work as is, using the typical specs provided by GRASS Canada INC.
- Drawer box material based on 16mm thickness.
- This package is NOT intended for versions prior to Cabinet Vision version 10.
- Please report any problems with this package to <u>tech@planitcanada.ca</u>.
- The contents of this package can be freely modified to suit your needs, however if it fails to function correctly after modification, then you can resolve this by doing one of the following:
 - Re-import the original package and allow it to overwrite existing items.
 - Contact Technical Support to book a time with a tech:

To Request Support Click here to submit a request >

For General Inquiries Click <u>here</u> to send us and email >

Call us anytime at 888-824-1474

An additional PCI UCS DRWLIP may be required to manage the Drawer Box Position, through various construction methods.

***NOTE: This UCS has been around for a while, so some clients may already have

it. Adding the new Grass Vionaro Drawer Construction to it will be required. *** Additional assistance to modify or obtain this UCS, see contact info above.

Importing the Grass Package

At the Solid splash screen, click the Utilities Tab and then select 'Setup Package':

Cy 🗋 🖻) -

Please note the following details:

NOTE: Unless otherwise specified, it is recommended that this check box be checked for each item when importing this package.

This icon 🧾 indicates that this item does not currently exist in your database and importing it will not have any effect on existing database objects.

The icon 🖼 indicates that the item already exist in your database and the Package Utility will use that item instead of re-importing it.

The icon 🖼 indicates that an existing item will be overwritten with the same item in this package.

NOTE: you must click on the so or buttons to overwrite items in the package. See Import Options below for more details.

Grass Package - Import Options

There are five options in the toolbar, which allow you to choose how to import a Setup Package.

Use the existing item Overwrite the existing item

()

Prefex The Item Names – If selected, this option allows the user to assign a Prefix to each item imported with this Package.

Overwrite All Matches With Package Contents – Will overwrite all existing items in your database with the contents of the Package.

Use Existing Items For All Matches – Will use all the existing items in your database rather than overwriting them with the Package contents.

Overwrite Child Matches With Package Contents – Will overwrite all existing children of items in the Package that match those in your database.

Use Existing Items For Child Matches – Will use all the existing children in your database rather than overwrite them with the Package contents.

Turn On/Off Overwrite Mode – Allows you to overwrite existing items by selecting them individually. This will cause items in the Package to either overwrite the existing item or to use the existing item.

Once the package is imported, you will be informed that you have successfully imported the Package into Solid.

Grass Package - Network Installations

With a Cabinet Vision Network Installation, this package can be imported at the Server or at any workstation and will become available for use on all workstations.

No additional steps are required for network installations.

Note:

1. Naming

The names for these items are generic names indicating the options used. These materials are the completed box assembly that uses the **Drawer Guide** type material. These materials get added to the Guide Material Schedule.

2. Material Options

Each one of these Drawer Box assemblies has all the required materials added to the Kit, to be pulled into material reports.

IMPORTANT: Adding and removing materials from Kit, **DOES NOT** modify machining or the models!! Kit is for material lists and pricing **ONLY**!

DYNAPRO Drawer Guide Materials

This package includes the DYNAPRO Drawer Guide materials used in the VIONARO system.

NOTE: These materials are used for material lists only. The drawer guide machining is managed in the VIONARO Drawer Box assembly materials mentioned above.

Using Kit Materials

Some materials may include the necessary materials to complete the assembly, which is inserted as a Kit. Adding these as a Kit, enables these items to appear in a material summary report for tracking, bidding and ordering purposes.

To modify these:

From the Material Manager, double click on any of the materials to open the Material Properties window. (You can also right click on the Material and choose Properties)

Click on the Kit icon 🔅 to open the Material Kit Editor window.

In this image you can see the items that make up a complete VIONARO H185 Assembly in Snow White.

To add an item, highlight it in the Right Pane and press the Left arrow.

To remove and item, highlight it in the Left Pane and press the Right arrow.

Pricing

The materials included in this package, have \$0 values for pricing. Be sure to go through all of the materials you will be using, and assign accurate pricing for your shop.

You do not need to add pricing to the Assemblies, just the kit items. (The actual material with SKU #'s)

Models

NOTE: Not all Versions of Cabinet Vision have this capability!

Each Drawer Box Assembly includes 3D models used to visually represent the VIONARO Drawer System.

It is recommended that you should not modify these, however if you wish to examine them: From the Material Manager, double click on any of the Drawer Box Assemblies to open the Material Properties window. (You can also right click on the Material and choose Properties)

Click on the Model icon Model to open the Model Editor.

As you can see in the image, there is a lot of info! Along with the models, there are some extra boring, as required, that has formulas so it will adjust accordingly in the jobs!

Drawer Guide Schedules

This package includes two VIONARO Drawer Guide Schedules:

- Vionaro Graphite
- Vionaro White
